

This unit has been constructed especially for jewelers and small workplaces which are in need to plate occasionally some pieces. This unit is absolutely not suitable for plating a lot of pieces at once. This unit is equipped with cathode movement, a digital read out of the voltage and 5 recipients of 1 liter each.

Applications : degreasing, rhodium plating, gold plating, silver plating,...

MOD. MG/1

Technical information :

- Dimensions : 600 x 180 x 220 mm.
- Weight : 16 kg
- Power supply : 230V 50/60 Hz
