

This rolling unit, which works completely automatic, makes it possible to roll stamped rings and rings/bangles made out of tubes to a specified ring size. An internal electronic measuring system is controlling continuously the ring size during the rolling process. All different alloys can be processed with this fabulous unit.

MOD. RW/CNC

NEW DESIGN

Technical information :

- Electronic measurement : diameter 9.0 mm – 80 mm
 - Dimensions : 1200 x 1000 x 1400 mm.
 - Power supply : 230 V 1800 W
 - Air connection : 6 Bar
 - Pressure power : 57 Nm
- Weight : 314 kg

OPTION :

In/out feeding belts + linear robot arm
