

This vacuum casting unit is designed for the professional user. The simplicity of handling this machine was one of the main concerns during the development.

The machine has a powerful vacuum pump and a very strong vibrating vacuum table or investment mixer in combination with a vacuum casting chamber of stainless steel.

This unit will surprise you with its exceptional casting results.

MOD. VCP/P/T

Technical information :

- Dimensions : 900 x 550 x 300 mm.
 - Weight : 36 kg
- Power supply : 220/230V – 800W
- Diameter flask : 65-85-100-125 mm
 - Max height flask : 180mm
- Vacuum pump : 10m³/h with double function (bell + casting)
- Vacuum bell : 250 x 300 mm

MOD. VCP/P/G

Technical information :

- Dimensions : 900 x 550 x 1100 mm.
 - Weight : 48 kg
- Power supply : 220/230V – 1200W
- Diameter flask : 65-85-100-125mm
 - Max height flask : 180mm
- Vacuum pump : 10m³/h with double function (mixer + casting)
- Vacuum investment mixer : standard 2 L
(4L on request)
